Clivet products comply with applicable product directives, as required in all EU countries, in order to guarantee an appropriate level of safety.

The wide range of Clivet products and complete systems comply with the requirements of the implementing measures for Directives 2009/125/EC (ErP-Energy related Products) and 2010/30/EU (Energy labelling), whose purpose is to reduce the energy consumption of products for heating, cooling, ventilation and hot water production, encouraging the user towards energy-efficient choices.

Clivet participates in the EUROVENT "Liquid Chilling Packages and Heat Pumps" and "Air Handling Units" Certification programmes. The products concerned feature in the EUROVENT guide to certified products and on the website www.eurovent-certification.com. The programmes apply to water chillers up to 1500 kW and to air handling units.

With the aim of providing Customer satisfaction, Clivet S.p.A. has supplemented and certified its Quality, Environment and Safety Management Systems, in accordance with the ISO 9001, ISO 14001 and OHSAS 18001 International Standards.

Clivet is committed in promoting the green building principles and has become a member of GBC Italia. This organization collaborates with USGBC, the U.S. nonprofit organization that promotes worldwide the LEED® system of independent certification.

In 2015, Clivet became a partner of CasaClima. As a result, Clivet is now part of a network of companies renowned for their technical expertise and constant focus on sustainable home management.

معرفی شرکت دژاتک

معرفی شرکت دژاتک

History

- Founder of Dejatech, Mr. Jan Deckers, invented the first aluminium heat exchanger in 1970.
- At this moment more than 41 patents.
- Due to these patents basically every European central heating manufacturer is using Dejatech technology.

1970

Jan Deckers builds the first cast-aluminum heat exchanger, the LP24.

1980

Jan Deckers designs the first condensing boiler that makes traditional boilers far more economical, the TP ("Thermo Punaise").

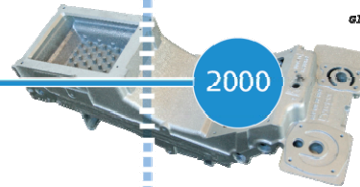

1990

Jan Deckers starts his own business and founds Dejatech.

DEJATECH
Global Energy Solutions

2000

Dejatech obtains another patent for a heat exchanger developed in-house.

2012

Deurne company Ohron Industries becomes majority shareholder.

OHRON
INDUSTRIES

2013

Dejatech's laboratory in Belfeld sees considerable expansion.

2015

The company is preparing to produce complete appliances to be sold under private label.

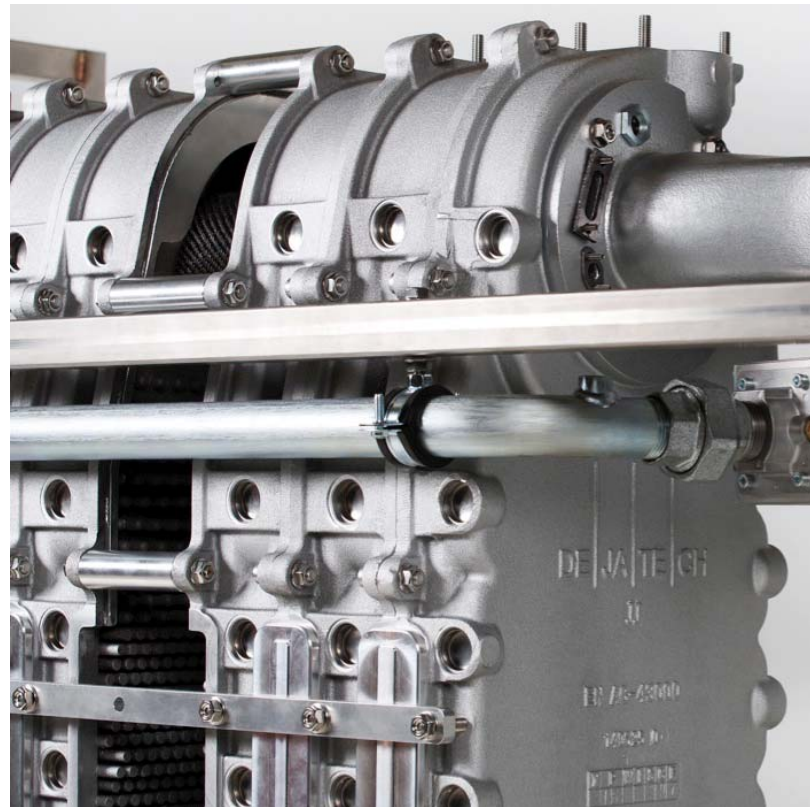

توسعه تاسیسات آترینا

معرفی شرکت دژاتک

Who is Dejatech

- Dejatech is a leading development company, operating in a dynamic, constantly changing heating branch
- A company with more than 20 professionals
- The only company who develop, engineer and produce heat engines and complete boilers.

توسعه تاسیسات آترینا

معرفی شرکت دژاتک
